

**1 Ø Submersible Pump
Control Panel
Model: SP 150**

Technical Specification:

- Input Supply Voltage: 230 VAC 50Hz
- Operating Voltage: 200 - 260 VAC, 50 Hz
- Output: 1 Potential Free Relay Resistive Contact
- Compatible With: Single Phase
- Temperature: 5 to 60 °C
- Dimension (LXWXD): 235X210X95 mm
- Mounting: Wall Mounting
- Enclosure: ABS Plastic Enclosure
- Weight: 1700 gms. Approx

Features:

- Single Phase Submersible Pump control panel/Starter
- Indication of Power On, Pump ON, Over Load, dry Run and Capacitor Cut off
- Dry Run Over Load and Capacitor Cut off Protection
- Analog Voltmeter And Ammeter
- Suitable for Single Phase Submersible Pump (Upto 2 HP)
- Make to order as requirement/specification
- Startig Capacitor and Runnig Capacitor in-built (as per requirment HP wise)
