

Automatic Water level Controller Model:WLC 100

Technical Specification:

- Input Supply Voltage: 230 VAC 50Hz
- Operating Voltage: 200 - 260 VAC, 50 Hz
- Output: 1 Potential Free RelayContact Resitive
- Compatible With: Single Phase Pump
- Temperature: 5 to 60 °C
- Dimension (LXWXD): 230X160X50 mm
- Mounting: Wall Mounting
- Enclosure: Sheet metal power coated box
- Weight: 900 gms. Approx

Features:

- Fully automatic Water level controller for upper and lower tank
- Microcontroller based Software Technology
- Indication for both tank BOT, MID and TOP level of water in tank
- Indication of Power ON, Pump ON, Dry Run and Water Flow.
- Auto/ Bypass (Manual) mode
- Suitable for float switch S.S. sensors, Megnetic sensor and Pressure switch
- Override function in automode. (Only in S.S. Sensor)
- Power ON/OFF switch with neon lamp
- Buzzer use for water flow
- Suitable for Single Phase Domestic, Monoblock, Openwell and Self Priming Pump
